# our HERITAGE

Powerful anti-ageing by-weekly treatment

## Anti-Photoageing Sheet Masque 25ml

A gentle, yet intense treatment that improves:

- Elasticity
  - Collagen
- R99**  
AA/00450/19

Wet freshly cut (and bruised) Rooibos is placed in a long low heap across our tea court to "sweat" or ferment in heaps for 10 to 14 hours. Temperatures during sweating can reach between 34°C and 38°C. The fermentation process involves oxidation, brought about by enzymes naturally present in the plant. During this process the product changes from green to a deep amber colour and develops its distinctive aroma.

September is Heritage Month, and Annique's heritage is rooted in Rooibos. Annique was the first company to develop Rooibos-based products and it is this miracle ingredient that has changed countless people's lives both personally and professionally. Rooibos is and always will be the success formula that will carry us into the future.
